PROFILE

An UI/UX designer with a proven track record at AspiraSys, specializing in web development. Passionate about transforming client requirements into visually appealing and user-friendly designs. Proficient in utilizing the Figma tool for effective design conceptualization and collaboration. Known for successfully completing real-time projects, showcasing a strong commitment to excellence in design.

PROFESSIONAL EXPERIENCE

UI/UX Developer

07/2023 – present

AspiraSys

- Acquired HTML5, CSS3, Bootstrap, and JavaScript, applied to diverse projects like music players and static animation websites.
- Contributed effectively in a 3-member team to successfully deliver a real-time project.
- Excelled in UI/UX design using Figma, ensuring visually appealing and user-friendly interfaces.
- Created impactful prototypes and wireframes for clear design communication within the team.
- Managed projects seamlessly with Trello, organizing tasks and ensuring timely delivery.

PROJECTS

CRS Web App

Real-Time Project

- Designed a real-time project for CRS, aligning closely with client requirements and utilizing Figma for meticulous design conceptualization.
- Delivered the project within the specified timeframe, showcasing a commitment to timely and efficient delivery.
- Developed stylish and visually appealing styling elements to enhance the overall user experience.
- Collaborated seamlessly with a team of three members, demonstrating strong teamwork and communication skills in the project's successful execution.

My Portfolio [↗](#)

- Developed a captivating web portfolio using HTML5, CSS3, and JavaScript for interactive elements
- Achieved responsiveness across devices for a seamless user experience.
- Utilized Figma for meticulous design, ensuring visually appealing layouts.
- Enhanced aesthetics and functionality with additional libraries, creating an engaging user interface.
